With easy-to-install rail sections, you can add a wide variety of accessories, including cameras, benches, banners, speakers, electric chargers, garbage cans, and much more!

**BECOME THE LIGHT
OF THE CITY.**

LUMCA: WHERE FORM AND FUNCTION REALLY MEET.

Do you envision a new development project with stunning lighting that simply guarantees the wow factor with your clients? Do you have pragmatic concerns regarding your luminaires, such as their useful life, robustness and easy maintenance? Are you fed up of the typical cookie-cutter approach to lighting and craving true breakthrough lights?

LUMCA LIGHTS UP NEW POSSIBILITIES.

Lumca has many decades of experience in designing and manufacturing lighting products that are both beautiful and brilliant. We have forged an enviable reputation as a lighting manufacturer that strikes the perfect balance between aesthetics, practicality and sheer innovation. We go beyond just "developing" lights. We tap into the needs of our clients to create appealing light designs—with ingenious features, such as tool-less maintenance, highly efficient optical systems, and detachable parts that can be mixed and matched in a variety of ways.

There's R&D. And then there's Lumca R&D. With an innovation-driven culture and commitment to high performance, we ensure that the quality of our products surpasses industry standards. From our designs to the materials we use to our manufacturing processes, Lumca provides crave-worthy lighting products for large-scale projects and prestigious clients across North and Central America.

All of our luminaires are handmade, attesting to the level of expertise and craftsmanship only Lumca can provide. Thanks to our simple, disposal-free, and organic plaporization process, you can rest assured you are getting marine-grade luminaires with just one coat of treatment and without producing any greenhouse gases. What's more? All of Lumca's luminaires undergo over 5000 hours of saline fog tests—the highest in the industry. Robustness and environmentally friendly luminaires? Lumca's product components and processes can contribute to LEED points.

In addition, Lumca's luminaires are mainly made out of extruded, non-porous aluminum, which means all of our lighting solutions are extremely lightweight—a great bonus when calculating loads on poles. Need even more flexibility for custom projects? The processes with which we can bend our aluminum and cut it to any size means that you can get exactly the type of luminaire design you want.

WE'RE PAVING THE WAY TO THE FUTURE OF LIGHTING. WILL YOU JOIN US?

WE'RE CERTIFIED!

Lumca is certified ISO 9001:2008. Lumca's products are also tested and certified at independent laboratories to guarantee compliance with national and international standards that govern the lighting industry.
